# Admit Application Evaluation System

The Entire Evaluation Process Made Faster, Easier and More Efficient

CollegeNET's Admit is the self-service application evaluation system that manages the entire admissions process online, from application submission through evaluation and decision. Admit gives authorized reviewers 24/7 access from home, office or out of town. It facilitates collaborative decisions. And it streamlines every step of the evaluation process to help you get decisions out fast – without printing a single page.

APPLICATION

DECISION

Accept applications and letters of recommendation online.

Automatically attach transcripts, resumes and other supporting documents directly to the application.

Communicate with applicants via CollegeNET's Applicant Portals.

Collect

Notify

Provide secure online decisions.

Allow appplicants to review their application status anytime.

Allow applicants to respond to decisions and submit their deposits online.

Automatically sort applications and assign to evaluators for review.

Accomodates different program's review processes, including multiple review rounds.

Distribute

Evaluate

Design custom scoring systems and compare applications side-by-side.

View all comments and scores, and reassign evaluations for second opinions.

CollegeNET®

Mobile Compatibility

Admit lets you view and evaluate application forms from your tablet or smart phone, anywhere, anytime. Thanks to responsive design technology, evaluation on a mobile device is even easier than on a computer – and more convenient.

Full Integration with Other Admissions Systems

Admit integrates fully with CollegeNET's Prospect CRM, Application Processing and Applicant Portals, as well as non-CollegeNET applications. All transmission of data between Admit and your SIS is automatic.

With Admit You Can:

• Eliminate printing, filing, copying and hand circulating – your school saves time, paper and energy

• Organize all related application materials – Admit automatically attaches each applicant's test scores, letters of recommendation, transcripts, portfolio, etc. to their application – No more misplaced or overlooked documents

• Centralize viewing and evaluation – all viewer comments appear in one place for each applicant

• Encourage collaboration – all reviewers' comments and applicant scores are visible to authorized viewers

• Improve convenience and efficiency – authorized viewers can access the system from home, office or out of town; they can view side-by-side comparisons of applications and have multiple rounds of reviews

• Provide individual department control – each department may configure their own rounds of review for their applicant pool and access evaluations and comments at each stage

• Allow applicants to view their application status and decisions, and place deposits via Applicant Portals

• Automatically sort applications and create application pools – Admit automatically routes each application to the appropriate department or group on your campus

• Configure features to meet your needs – reviewers can easily locate individual applications using filtered search and other functions, according to your specifications

• Create and export valuable reports – Admit provides robust reporting tools to identify, track and follow up with applicants

• Import data such as test scores from your SIS via XML to update applications in the Admit system

• Connect via single sign-on from your SIS login

• Assign specific permissions to individual users
