

## Milestones™

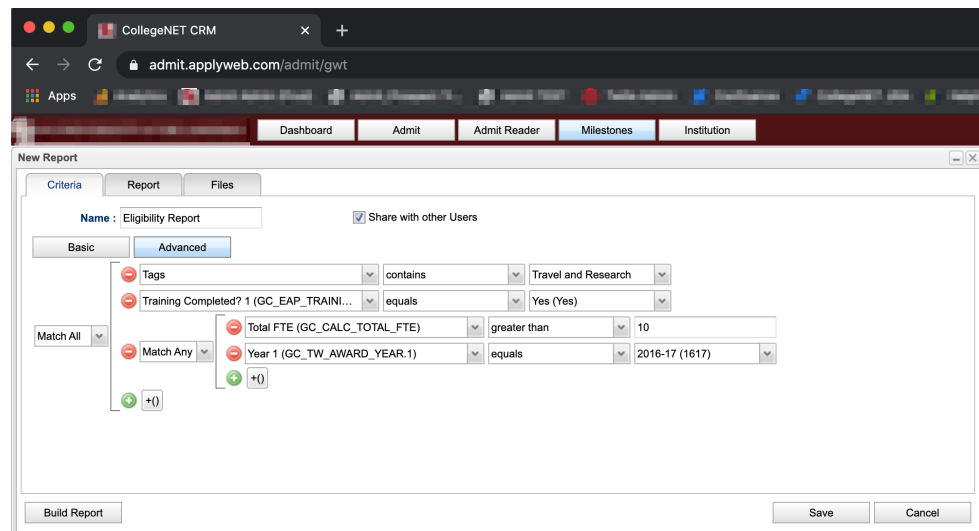

Centrally Store and Coordinate Matriculation Data and Communications

Manage the entire student services lifecycle by adding Milestones (part of CollegeNET's CRM) for Enrolled Student Management.

### Use Milestones™ to:

- Coordinate communication, reporting, authorizations, matriculation forms and information management for enrolled students in a central SaaS environment.
- Provide College and Academic Department representatives direct access to degree progress and other critical enrollment information for their enrolled students – use custom permissions to provide appropriate authorization.

- Create customized reports that allow for real-time tracking of key enrollment markers.

### For more information:

Please contact your CollegeNET Account Manager, or Sales at 503.973.5200 or [sales@collegenet.com](mailto:sales@collegenet.com).
